
KeyMacro is a program designed to protect your computer from keylogging. The application monitors for login attempts, captures keystrokes and displays them on-screen. It also includes a handy feature for preventing keyloggers from modifying the desktop, and it provides a help section for troubleshooting. User-friendly interface with decent security First things first: KeyMacro will not disable your keyboard, and the entire process is done entirely using the keyboard. That said, the program allows you to easily turn the monitor off if you feel that some nefarious person has found a way to make a keylogger work. Additionally, the program has a basic help section, a live monitoring feature, and a detailed configuration utility, so it is easy to get the hang of things. After entering the relevant information, you can also select the specific programs you wish to monitor, and the results will be displayed on-screen. Clean interface, advanced security and reliable software In general, the program is very simple and user-friendly, which is great if you are looking for something that is not extremely complex. As for its security capabilities, it provides you with a range of options for blocking keyloggers from accessing your keyboard. The application is known for its clean and professional interface, which is definitely a plus if you need a reliable monitoring tool that will not cause any harm to your computer. F-Secure SiteCrawler Description: F-Secure SiteCrawler is a simple program that downloads the top articles, videos, blogs and images from online news sites. All you need to do is enter the URL you want to download, and the software will do the rest. If you want, you can view the text you have downloaded right away, or you can simply add it to your favorites. Compatible with Firefox, Chrome and Internet Explorer First things first: the application requires you to download and install the browser plugins. While the process is simple, you may want to try it out yourself to check how it works. After installing the necessary plugins, all you need to do is enter the URL you wish to scan, and SiteCrawler will start downloading the corresponding content. In addition to the aforementioned browser plugins, the application comes bundled with a list of top news sites, so you can always check if the page you wish to get the top articles and videos from is included in the list. Despite its very simple interface, SiteCrawler provides a range of useful features 45cee15e9a
