## **Antares Autotune EVO V6 09 VST HAPPY NEW YEAR DYNAMiCS Torrent**

April 27, 2007 I am having a big delay when using Autotune Evo or AVOX2 in Logic. Most of my other plugins don't have this problem. How autotune works. logic? It is very easy. Logic creates a new sample layer with all sounds in stereo and all channels in stereo. Each audio channel and all sampling channels is a stereo channel. Since I'm talking about Logic, you must have a stereo audio input on your synthesizer. On any stereo system, you can choose between mono and stereo. I use mono for recording (typically in my stereo) and stereo for playback in multi-channel mixing consoles.
