What's New in the Disk Space Plus?

Disk Space Plus is a straightforward tool that can tell you how much space is occupied on your hard drive and which folders are the largest. Analyze disk space to discover the largest files. With the help of this type of software, you can figure out what files you can delete or move in order to free up disk space and make room for new data, such as Windows updates or file downloads. View disk capacity at startup. Following a speedy and simple setup procedure, you're welcomed by an outdated window that automatically calculates the total capacity of your drives and shows bars that indicate occupied space. Inspect pie charts with the folder distribution. Clicking a partition opens a new area with a pie chart, where the differently colored slices indicate the biggest folders. You can click any slice to go deeper and learn the distribution and size of the containing subfolders. The folder name from the upper-left corner represents the root directory. Find out total files, folders and bytes, and other stats. Additionally, you can click the arrow button from the upper-right corner to visit the root, the i button to get statistics for the current location (total files, folders and bytes, average file size, hidden files and file bytes, depth), as well as the refresh button if any changes were made in the meantime. Discontinued software project. Unfortunately, the software developer has discontinued this application. It's not freeware but the only limitation is represented by a nag screen. Otherwise, you can use Disk Space Plus with all features unlocked. The program is a useful tool for everyone interested in recovering Disk Space, especially if he/she needs to free up disk space. Disk Space Plus allows you to efficiently review your disk space for your Computer, Laptop, or USB drive. The software will automatically calculate how much space is occupied and how much is free on your disk, based on the data stored on your drives. You can utilize the data on your drives to gain a better insight of what files and folders are consuming the most space on your drive and see where those files are located. **DISCLAIMER:** Disk Space Plus is freeware, but the trial version has a nag screen before it can be used. Disk Space Plus Pro is a useful tool for anyone interested in recovering Disk Space. The program shows how much space is occupied by the files and folders on your Computer, Laptop, or USB drive. The software will automatically calculate how much space is occupied and how much is free on your disk, based on the data stored on your drives.
